## DETAILED ACTION

### *Double Patenting*

1. Claims 1-23 are provisionally rejected under the judicially created doctrine of double patenting over claims 1-21 of copending Application No. 09/329730. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: creating two dimensional projection views of a three dimensional computer defined graphical model. The generation of the views proceeds sequentially and responds to visual and user constraints and modifications.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
